A VERITAS DESIGN GROUP PUBLICATION

Ramadan Mubarak to all our Readers!

Welcome to the March'24 edition of VERITAS E-news, where we're excited to highlight our journey in crafting sustainable and innovative railway station solutions across the world. These projects not only connect communities and fuel economic growth but also enhance accessibility and tackle environmental challenges.

For a deeper look into any of our projects or initiatives, feel free to reach out. Enjoy discovering what makes this month's VERITAS E-news special!

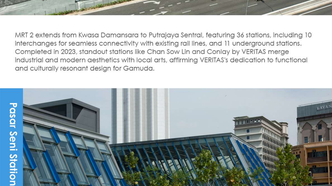
Mass Rapid Transit (MRT) 1 and 2

Completed in 2017, MRT 1 stretches over 41.5 km featuring 24 elevated and seven underground stations. VERITAS's design expertise shines through at key stations like Pasar Seni, Muzium Negara, Bukit Bintang, and Merdeka. Each station presents a unique theme: Muzium Negara showcases the 'Transition' from the past to the present, Merdeka celebrates Malaysia's Independence, Pasar Seni represents the 'Confluence' of cultures, and Bukit Bintang exudes the 'Dynamic' energy of Kuala Lumpur. These stations, notably near KL Sentral and Stadium Merdeka, serve as both pivotal transit points and cultural icons, crafted for Gamuda.

Merdeka Station

Bukit Bintang Station



Muzium Negara Station

MRT 2 extends from Kwasa Damansara to Putrajaya Sentral, featuring 36 stations, including 10 interchanges for seamless connectivity with existing rail lines, and 11 underground stations. Completed in 2023, standout stations like Chan Sow Lin and Conlay by VERITAS merge industrial and modern aesthetics with local arts, affirming VERITAS's dedication to functional and culturally resonant design for Gamuda.

Pasar Seni Station

Proposed East Coast Rail Link (ECRL)

The East Coast Rail Link (ECRL), featuring 20 stations designed by VERITAS, is a transformative infrastructure project slated for completion in 2026. This standardized double-track railway will connect the East Coast Economic Region with Peninsular Malaysia, facilitating efficient passenger and freight transport.

The project integrates key structures such as tunnels and bridges, ensuring a robust and unified signaling system across the network, and exemplifies our dedication to sustainable development and connectivity. This visionary project, tailored for China Communications Construction (CCCL), is poised to become a cornerstone of Malaysian infrastructure development.

High-Speed Rail (HSR) Stations: Connecting Malaysia and Singapore (Putrajaya, Negeri Sembilan, Melaka and Johor Stations)

The Kuala Lumpur-Singapore High-Speed Rail (HSR), project will reduce travel time to 90 minutes, enhancing economic links and environmental sustainability. VERITAS designed five stations - Batu Pahat, Muar, Melaka, Seremban, and Bangi-Putrajaya - melding modern design with local heritage.

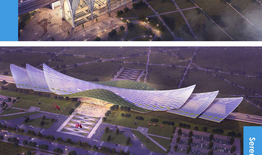
Batu Pahat Station

Melaka Station

Muar Station

Resuming in 2020 after a brief pause, the designs incorporate Putrajaya's Islamic motifs, Seremban's Minangkabau-inspired roof, Melaka's maritime-themed roof, Muar's Rehal-inspired design, and Batu Pahat's Kuda Kepang-influenced facade, showcasing VERITAS's expertise in integrating tradition with contemporary infrastructure.

Putrajaya Station



Seremban Station

This work, designed for MyHSR Corporation, exemplifies VERITAS' skill in weaving traditional elements into the fabric of modern, high-speed rail infrastructure.

LRT Line 3 Kuala Lumpur and Selangor

The Klang Valley LRT3 line, enhancing transit across Selangor and Kuala Lumpur, will feature 37 stations (26 above-ground, one underground) to boost urban mobility by 2024. Designed for optimal user experience, it includes accessible platforms, comprehensive amenities, and integrated transport facilities.

Dato' Menteri Station

Kerjaya Station

Glenmarie 2 Station

Stadium Shah Alam Station

VERITAS is leading the design for seven key stations: Glenmarie 2, Temasya, Kerjaya, Stadium Shah Alam, Dato' Menteri, Raja Muda, and UiTM Shah Alam, highlighting our commitment to urban transport innovation and architectural excellence in the region. This endeavor, designed for Malaysian Resources Corporation Berhad (MRCB), prioritizes uniformity and operational efficiency across the network, paving the way for a more interconnected and user-centric public transportation system.

UITM Shah Alam Station

Seremban Sentral

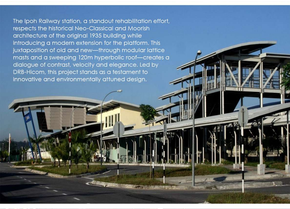
This pioneering development, set to be the country's first net-zero carbon emission railway station, marks a significant leap in Seremban's development and connectivity. Seremban Sentral harmoniously merges the historic 1904 station with contemporary architecture, creating a captivating blend of tradition and modernity.

The preservation of the original structure honors its storied past while seamlessly integrating Minangkabau design motifs, paying homage to the region's cultural heritage. This fusion results in a striking architectural ensemble that not only serves as a gateway to Seremban but also stands as a testament to the enduring beauty of architectural evolution. Designed for Dhaya Maju Infrastructure Asia, Sdn Berhad (DMIA), Seremban Sentral is poised to be a landmark of sustainable development and heritage preservation.

Rawang-Ipoh Double Track Railway Stations

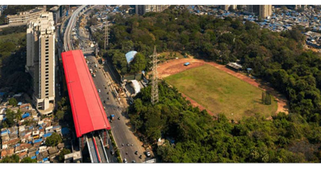
Completed in 2007, the Rawang-Ipoh Electrified Double Track Project by VERITAS spanning 185km with 15 stations has been a catalyst for development across small towns. Marrying modern aesthetics with traditional motifs suitable for tropical and high-speed rail contexts, the stations feature intuitive layouts, curved canopies and climate-smart designs like brise-soleil.

The Ipoh Railway station, a standout rehabilitation effort, respects the historical Neo-Classical and Moorish architecture of the original 1935 building while introducing a modern extension for the platform. This juxtaposition of old and new—through modular lattice masts and a sweeping 120m hyperbolic roof—creates a dialogue of contrast, velocity and elegance. Led by DRB-Hicom, this project stands as a testament to innovative and environmentally attuned design.



Mumbai LRT Stations
Metro Line 9 and Metro Line 5

Metro Line 9 features 9 stations along a 13.581 km route, enhancing connectivity from Andheri to CSIA and Dahisar to Mira-Bhayander. It integrates with Mumbai's main transport routes, including a 20-hectare Maintenance Depot in Mira-Bhayander. Meanwhile, Metro Line 5, with 5 stations over 24.90 km, connects Thane, Bhiwandi, and Kalyan to the broader network. Including Metro Lines 4 and 12 and the Central Railway, VERITAS is responsible for the uniform design of all 14 stations across both lines for the Mumbai Metropolitan Region Development Authority (MMRDA), aiming for a 2027 completion.



Lishui Qiao South Station Beijing

The Beijing 5th Rail is part of a large transit infrastructure to link the whole of Beijing. The 5th Rail network consist of six stations running parallel to the Olympic site that is a few blocks away. Designed as a series of stops that tell a story to be interpreted differently. It expounds the ideals of the Olympic's, sustainable cityscape development and a message of humanism.

These ideals are merged with the story of Beijing to create a simple but elegant built form: solid and natural at the base. It opens up to lighter clear transparent canopies to allow generous daylight to the platforms. The Lishui Qiao Station was designed by VERITAS for Beijing General Municipal Engineering and Design Research Institute and was completed in 2007.

Subang Skypark KTM Station

The Double Track Project's station, spanning 4,350 sq.m between Subang and Sultan Abdul Aziz Shah Skypark Terminal 3, is designed as a key urban gateway, blending seamlessly with Terminal 3 and the city's ambiance. Prioritizing a people-centric approach, it features easily navigable ground-floor concourses and plans for future connectivity to adjacent developments.

A covered walkway links it directly to the airport, spanning 150m. The station's design is airy, transparent, and built to be a monumental addition to the area, with plans for direct airport access via the Nexus Skypark Development and potential future links to Kwasa Land Development, catering to both immediate and long-term urban connectivity needs. This strategic design, crafted for ARA Group, addresses both immediate transport requirements and anticipates future urban integration needs.

Architects to Host Tours of KL Buildings They Designed

https://www.thestar.com.my/metro/metro-news/2024/02/27/architects-to-host-tours-of-kl-buildings-they-designed?fbclid=IwAR2rfvDbLPPkPH50PhQeypZrAwucy9PWmArcS8jZvjz_NXWIChdII_A-5eE

On 27th February, The Star highlighted the Singgah KL press conference with the headline *"Architects to Host Tours of KL Buildings They Designed,"* setting the stage for the much-anticipated event on March 2nd and 3rd.

Singgah KL offered the public a unique opportunity to explore the architectural wonders of Kuala Lumpur, guided by the very architects who designed them. This initiative opened up the intriguing world of architecture, making it accessible to everyone interested in the design and stories behind KL's iconic buildings.

We proudly showcased five of our acclaimed projects, each a testimony to our dedication to design and innovation:

Her Stories: Spotlighting Women's Experiences in Architecture and Design

http://www.starproperty.my/pulilou/march-2024

On 1st March, VERITAS Vice President Lillian Tay and Associate Farah Yusof were featured in the Star Properties' Women Power special edition's *Her Stories* section. Celebrating their profound impact on architecture and design, the feature shares their unique journeys, challenges and triumphs in reshaping the industry.

STAR PROPERTY, MARCH 2024
SPECIAL FEATURE

Her stories

Spotlighting women's experiences in architecture and design

BY LOREJAN IN KANANG
lorejan@thestar.com.my

In conjunction with International Women's Day, we celebrate the experiences of female architects who are spotlighted in this feature's section, *Her Stories*. Similar to many other cities in Malaysia, architecture was a previously male-dominated occupation that has seen a shift towards more female participation.

Hanging alongside the human behind architecture creates a connection between the built and the builder. Here are their stories.

Lillian Tay
Vice president
Veritas Design Group

"Architecture is a creative pursuit that shapes the environment we live in, influences our behaviors and facilitates people's lives, and ultimately shapes our future. It may be clients and corporations who bring the profile drivers but our role as architects and designers will serve the end user. I had the privilege of being exposed to architecture and decided I didn't want to do anything else because I felt it was a calling.

"While the design concept is the fun part of the job, it includes a lot more than just an office creative to develop and execute a design. It involves project management and client liaison and coordination. It is important for quality to produce a good product. The challenges I face may be a challenge for any women in the industry who are juggling between their family responsibilities from children to aging parents.

"I believe being a woman in the industry has allowed me to adjust thinking as one instinctively better remembered I can that is important to the end user. Not only are industry people trained to think that guys' networking is important, it is important to us. Unfortunately, it may often still be a boys' club in many shops/firms. As for women with children, it is important to have a woman architects and engineers in advanced pregnancy or immediately after to understand the intensity of women in general."

Roshdina Ismail
Associate
ZK Architects

"As a woman navigating the architectural landscape, I've encountered firsthand the unique challenges and limitations that have historically been prevalent in the field but have started, and continue, to evolve. My journey to achieve equal footing with our male counterparts has been a challenging struggle. However, I firmly believe that the key to standing shoulder to shoulder with our counterparts lies in our ability to continually sharpen our skills, deepen our knowledge, and boldly engage in conversations that challenge the status quo.

"As an industry where expertise and innovation reign supreme, it is essential for women architects to not only match but exceed the skill sets of our male counterparts. This means continuously honing our craft, staying abreast of the latest trends in architectural design and design methodologies, and pushing the boundaries of what is possible. It means not only demonstrating our expertise and competence but also showcasing a diversity of interpretations about what constitutes a good design or an architectural community.

"It is crucial for us to drive deeper into the architectural profession, recognizing that it is not just about creating aesthetically appealing and functional spaces. The role of women in architecture encompasses a broader spectrum, including advocating for sustainable construction and fostering inclusive, comprehensive knowledge and spaces that cater to the needs of a diverse array of individuals living in these spaces.

"Even though the construction industry is male-dominated I believe that it is ripe for change and transformation. I'm fortunate to work in an environment where my voice is heard and my opinion matters. My success is contingent on the quality and quality of my work. I focus on producing high-quality outcomes, allowing my character, work ethic, and professionalism guide my interactions with my peers. These are the traits that earn their respect."

Farah Yusof
Associate
Veritas Design Group

"My interest in various arts and crafts has always been a pathway to enhance people's living and working spaces. Alongside my passion for the arts and crafts as an architect, we are able to shape the environment around us and influence shapes as individuals living in these spaces.

"Even though the construction industry is male-dominated I believe that it is ripe for change and transformation. I'm fortunate to work in an environment where my voice is heard and my opinion matters. My success is contingent on the quality and quality of my work. I focus on producing high-quality outcomes, allowing my character, work ethic, and professionalism guide my interactions with my peers. These are the traits that earn their respect."

Memorable designs

Roshdina
"Her current project, Pulau Pangkor Resort, is special since it is her first project. The challenge of this project was to create a sustainable resort that would allow guests to fully appreciate the natural beauty of the island while minimizing environmental impact.

"Embracing the concept of sustainability and harmony, we incorporated eco-friendly practices such as using local materials, implementing energy-efficient systems, and designing spaces that blend seamlessly with the surrounding landscape. The goal was to create a destination that not only offers a luxurious retreat but also serves as a model for how tourism can coexist with nature, ensuring the preservation of the island's ecosystem for future generations.

"These projects have been instrumental in my belief in the power of architecture to shape not only physical spaces but also the lives of those who interact with them. The challenges we faced in balancing environmental impact with economic viability underscored the importance of thoughtful design that can create profound connections with the environment and enhance the overall experience."

Tay
"Tay's favorite piece of work is her residence in Taman Tun Dr Ismail, which was a complete transformation from a dilapidated house to a contemporary family home. The project was a labour of love, with the entire family getting involved in the design process. The great satisfaction she felt upon the completion of the project underscores her dedication and the deep connection she has with her work.

Farah
"As a woman, Farah's favorite project is "Crossing the Bridge" in Cyberjaya, which was a collaboration with the local council of a "bridge" that connects two disconnected parts of the city. The project aimed to bridge the gap between the two sides, fostering a sense of unity and connectivity. The project's success underscores her commitment to using design to create meaningful connections and improve the lives of her community.

Lastly, everything that forms a strong foundation is built upon strong gardens in each building, making a more friendly and walkable neighbourhood with greater interaction and social connections."

Shaping Hopes and Dreams

https://digital.theedgemalaysia.com/theedgemediagroup/page-flip/e/epe/city/20240304city#fbclid=IwAR04eY2kR0-H-NqX8-8856kEy9XFBN5Eng-aRsI-NmJF-7QEwC-eAnfDTK6/

On 4th March, VERITAS Vice President Lillian Tay was featured in *'Shaping Hopes and Dreams'* within the esteemed pages of The Edge City and Country magazine. This in-depth article shone a spotlight on Lillian's transformative influence on both the skyline and the very soul of Kuala Lumpur.

Readers were invited to delve into her compelling narrative, exploring the visionary blueprints and profound inspirations she has masterfully brought to life. Through her work, Lillian not only redefines the architectural landscape of Kuala Lumpur but also instills a renewed sense of hope and aspiration within the community.

How Distinguished Architect Lillian Tay Helped Build Malaysia's Leading Architectural Practice

https://www.tatlerasia.com/homes/architecture-design/-meet-the-iconic-malaysian-architect-lillian-tay

On 5th March, Tatler Homes featured an exclusive article on VERITAS Vice President Lillian Tay, chronicling her remarkable journey to becoming Vice President of Malaysia's leading multi-disciplinary design practice.

Set against the backdrop of Malaysia's vibrant architectural scene, this piece offers an insider's look at the foundational pillars of Tay's distinguished career.

Readers are invited to explore the strategic blueprints and pivotal decisions that propelled her to the forefront of the industry, highlighting her contributions to shaping the nation's built environment.

This feature in Tatler Homes not only celebrates Tay's professional achievements but also provides valuable insights into the makings of a successful architect in Malaysia's competitive landscape.

How distinguished architect Lillian Tay built one of Malaysia's top architectural practices

By Jennifer Shu
Nov 03, 2023

CEDROM Veritas Architects (Design Area) president Lillian Tay

WHAT'S HAPPENING?

A VERITAS DESIGN GROUP PUBLICATION
March 2024

2024 Malaysian Housing, Urban Development and Property Summit

On 27th February, VERITAS Vice President Lillian Tay was one of the distinguished speakers at the 2024 Malaysian Housing, Urban Development and Property Summit with insights on *Future Ready & Future Proof-Urban Property Development*" at Berjaya Times Square Hotel, KL.

In Session 3, Lillian delved into *'Digitalization and Sustainability – Driving the Future of the Property Industry and Urban Development'*, spotlighting how ESG factors and digital innovation are pivotal in reshaping property development for a sustainable future.

V Teh Tarik Talk - L2020 v KL2040 Plot Ratios & Incentives by VAKL Architects

On 29th February, during the insightful V Teh Tarik Talk Series, hosted by VAKL Architects, attendees were taken on an explorative journey from the architectural and urban milestones of Kuala Lumpur in 2020 to the visionary projections for 2040.

The session, held at The Loft of VERITAS HQ, illuminated the transformative impact of evolving plot ratios and incentives on the city's skyline and its urban fabric, emphasizing a future where sustainability, technological innovation and cultural preservation converge to shape a resilient and vibrant Kuala Lumpur.

Architects delved into how green architecture, smart infrastructure and community-centric designs will play pivotal roles in steering the city towards a harmonious blend of tradition and modernity, making Kuala Lumpur a model for future urban living.

China Communications Construction Best Performance Consultant Award

In early March, VERITAS Architects was selected as one of the top 3 Best Performance Consultants of 2023 by China Communications Construction (CCC) for the East Coast Rail Link Project (ECRL).

VERITAS has proudly designed 20 stations for this line. This standardized double-track railway will seamlessly connect the East Coast Economic Region with Peninsular Malaysia, facilitating efficient passenger and freight transport.

The project will be completed in 2026.

VERITAS 1st Staff Quarterly Meeting

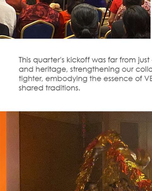
On 2nd March, the first Staff Quarterly Meeting of 2024 for VERITAS was a festive convergence at the Lembaga Getah Malaysia (LGM) in Kuala Lumpur, delightfully intertwined with Chinese New Year celebrations. The venue burst into a spectrum of color and cultural pageantry as our team members wholeheartedly embraced the festivities with their vibrant attire.

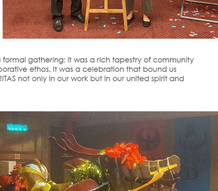
In a delightful showcase of spirit and style, Choong Wei Li and Angelina Chin triumphed in the fashion face-off, each clinching the title of best dressed in their respective categories after a 30-second strut of their festive best.

Adding to the event's highlights, a spirited mini-auction featured three standout 'Inner Fire' paintings from February's VERITAS Sports and Social Club (VSSC) event.

The auction's pinnacle was the sale of Ahmad Tajuddin's inspired piece, a portrait of Saza Nuriyana, which garnered an impressive bid of over RM500 from General Manager Jordan Tan.

Moreover, the meeting was elevated by the exuberant mini dragon dance performances from the five inventive tribes of VERITAS: I, D, E, A, and S. Each tribe brought forth a burst of creativity, fashioning their unique dragons and presenting mesmerizing 2-minute routines that captivated all present. With their exceptional display, Tribe S emerged victorious, claiming both accolades for best dragon and dance, stirring the competitive spirit among us.

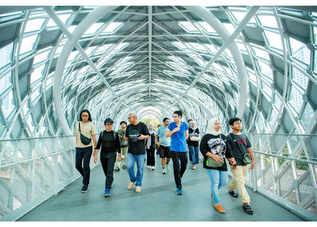


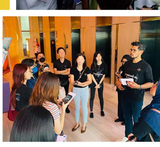


This quarter's kickoff was far from just a formal gathering; it was a rich tapestry of community and heritage, strengthening our collaborative ethos. It was a celebration that bound us tighter, embodying the essence of VERITAS not only in our work but in our united spirit and shared traditions.

Singgah KL 2024

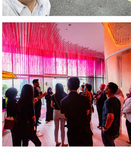
On 2nd and 3rd of March, VERITAS had the honor of hosting Singgah KL, an event that offered the public a remarkable opportunity to explore the realm of architecture through a series of site visits.

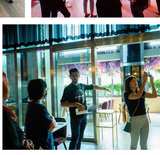




We proudly showcased five of our acclaimed projects, each a testimony to our dedication to design and innovation:

1. Star Residence, redefining luxury living.
2. Saloma Bridge, merging engineering excellence with stunning aesthetics.
3. W Hotel and Residences, a fusion of top-tier hospitality and architectural elegance.
4. KPG The Five, the essence of contemporary corporate architecture.
5. International School of Kuala Lumpur (ISKL), a bastion of advanced educational design.





These visits provided an immersive experience into the spaces that embody the spirit of VERITAS's design philosophy.

12th Annual Vertical Cities Conference to Envision '*Skyscaper City*'

On 5th March, during the 12th Annual Vertical Cities Conference, at the Grand Copthorne Waterfront in Singapore, VERITAS's Senior Associate Miguel Robles introduced the groundbreaking concept of 'Skyscaper City'.

This vision redefines urban living, proposing a network of interconnected public realms in the sky, and challenging the traditional isolation of high-rise buildings. Miguel argued for a cohesive approach to urban density, emphasizing the need for integrated vertical communities and seamless connections between public spaces, regardless of building ownership.

This innovative perspective not only addresses the challenges of modern urban living but also paves the way for more sustainable, connected, and community-focused cities in the sky.

VERITAS Sports and Social Club (VSSC) Friendly Futsal Match

On 7th March, the VSSC Friendly Futsal Match became a vibrant arena of team spirit and unity, drawing VERITASians together in a spirited display of football. This engaging event not only rekindled the staff's enthusiasm for the sport but also served as a testament to the power of sports in fostering camaraderie and connection. The atmosphere was electric, filled with friendly competition and laughter, encouraging an even larger turnout for future matches. It was a memorable day highlighting the importance of teamwork and collective enjoyment, further solidifying the bonds among VERITASians.

V Teh Tarik Talk - Nusantara Indonesia by Ar. Michael Tan

On 7th March, the V Teh Tarik Talk series presented a captivating exploration into the architectural heart of Nusantara Indonesia, guided by the expertise of Associate Michael Tan.

This enlightening session unfolded the rich tapestry of design principles, historical influences, and cultural nuances that shape the unique architectural identity of the region.

Participants were treated to an in-depth analysis of Nusantara Indonesia's distinctive aesthetic and structural elements, revealing the intricate interplay between tradition and innovation in Indonesian architecture.

This dialogue not only broadened understanding but also celebrated the diverse architectural heritage that Nusantara Indonesia brings to the global stage.

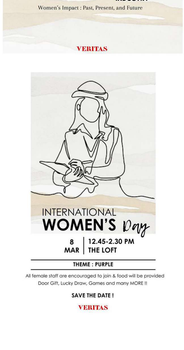
UPDATE: **NUSANTARA INDONESIA**
V TEH TARIK TALK BY AR. MICHAEL (YAB.)

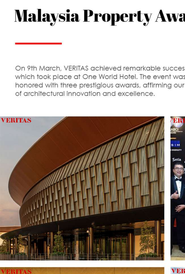
7TH MARCH 2024
THURSDAY
LOFT@OAM
5:30 PM - 6:30 PM

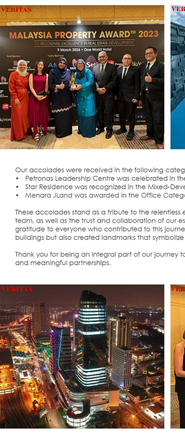
International Women's Day Celebration

On 8th March, VERITAS celebrated International Women's Day by honoring the exceptional women in architecture and design who have driven innovation and envisioned new futures for the built environment.

The event featured a forum spotlighting VERITAS's leading women, including Vice President Lillian Tay, the first woman to receive the prestigious PAM Gold Medal.



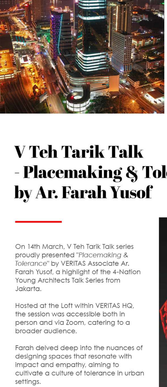


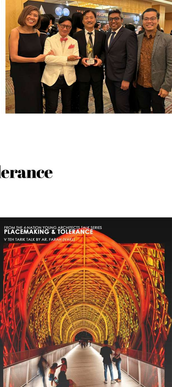


This day underscored their significant contributions and the lasting legacy they're creating for future generations in the field.

Malaysia Property Award 2023

On 9th March, VERITAS achieved remarkable success at the Malaysia Property Award 2023, which took place at One World Hotel. The event was a memorable occasion as we were honored with three prestigious awards, affirming our commitment to pushing the boundaries of architectural innovation and excellence.





Our accolades were received in the following categories:

- Petronas Leadership Centre was celebrated in the Purpose Built Category.
- Star Residence was recognized in the Mixed-Development Category.
- Menara JLand was awarded in the Office Category.

These accolades stand as a tribute to the relentless effort, dedication, and creativity of our team, as well as the trust and collaboration of our esteemed clients. We express our heartfelt gratitude to everyone who contributed to this journey. Together, we have not only constructed buildings but also created landmarks that symbolize the pinnacle of architectural splendor.

Thank you for being an integral part of our journey towards achieving excellence, innovation, and meaningful partnerships.

V Teh Tarik Talk - Placemaking & Tolerance by Ar. Farah Yusof

On 14th March, V Teh Tarik Talk series proudly presented "Placemaking & Tolerance" by VERITAS Associate Ar. Farah Yusof, a highlight of the 4-Nation Young Architects Talk Series from Jakarta.

Hosted at the Loft within VERITAS HQ, the session was accessible both in person and via Zoom, catering to a broader audience.

Farah delved deep into the nuances of designing spaces that resonate with impact and empathy, aiming to cultivate a culture of tolerance in urban settings.

This enriching dialogue provided attendees with a rare glimpse into the evolving paradigms of urban design and architecture, guided by one of the most visionary professionals in the field.

Ibu Kota Negara (IKN), Nusantara Site Visit

On 19th March, VERITAS President David M. Hashim and Malaysian Ambassador Datuk Syed Md Hasrin Tengku Hussin, along with a Malaysian delegation, visited the future site of Indonesia's capital, Nusantara, marking a significant moment for the Nusantara Masterplan Competition winner, VERITAS.

During their three-day visit from March 18th, discussions with Agung Wicaksono of the Nusantara Capital City Authority (OIKN) focused on Malaysian investment in the rapidly developing project, emphasizing the strengthening of Malaysia-Indonesia relations.

The visit underscored the importance of collaboration in the development of IKN, set to be inaugurated on August 17th to coincide with Indonesia's 79th Independence Day, showcasing a new era of urban development and bilateral cooperation.

VERITAS Penang Iftar Ramadhan

On 21st March, VERITAS Penang hosted a memorable Iftar Ramadhan party, bringing together colleagues and friends to break their fast in unity and celebration. The event took place at the Penang Kitchen, located within the Courtyard by Marriott in Penang, offering a warm and inviting atmosphere for all attendees to share in the joy and reflection of the season.
